

## REMARKS

Figures 1 and 2 were objected to because they needed be designated "Prior Art." Such correction has now been made to corrected drawing sheets enclosed.

The drawings were objected to under 37 CFR 1.83(a) for failing to show the first axis of symmetry, the second axis of symmetry, and the third axis of symmetry. The drawings have been fixed per the Examiner's suggestion.

The drawings also had numerous multiple numbering errors that are believed to not be errors. The reference characters 140 and 150 are different references to holders, so have not been corrected. Also, the same point is actually multiple points at one position.

The 35 USC 112 rejection of claim 19 has prompted the strikethrough as shown.

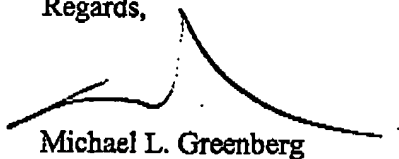

Claim 1 has been amended to mark particularly point out the present invention, per the allowable subject matter indicated in the last office action, and thus the claims that depend therefrom have been amended as well to over come the 35 USC 102 and 35 USC 103 rejections.

The Applicant thanks the Examiner for indicating that claims 11 and 13-19 are allowable. Claim 12 has been canceled, and its contents incorporated into claim 13.

Any extensions of time necessary are hereby petitioned for. Please charge all fees due and owing to Deposit Account Number 500356 in the name of A Plus Legal Services - Greenberg & Lieberman .

*I hereby certify that this was faxed on March 9, 2006, to (571) 273-8300.*

Regards,

A handwritten signature in black ink, appearing to read "Michael L. Greenberg". The signature is fluid and cursive, with a prominent loop at the end.
